

# World Internet Price

2020 - 2022

Billions of people around the world rely on their mobile phones every day. In the last seven years alone, almost **1.5billion** additional people have gained access to mobile data services. Despite the growing prevalence of these networks worldwide, the cost of gaining access can vary greatly from country to country particularly when it comes to the **price of mobile data**. Also, despite the vast global reach of the mobile economy, its clear it still has a long way to go to reach true accessibility.
